

EVA-suction hoses

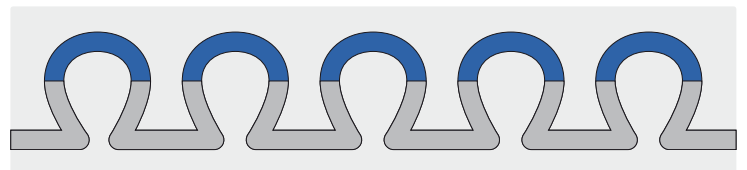

The choice of perfection

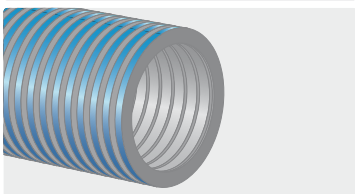

The bicoloured suction hose made out of ethylene vinyl acetate

- Fields of application: craft/industry, home, car wash, floor care, central suction systems, professional industrial cleaning and swimming pool systems
- Extremely light and highly flexible structure
- Weatherproof and resistant to abrasion
- Excellent recovery properties in case of strong radial deformation
- Available in DN 36, 38 and 50 mm
- Vacuum-tight up to approx. 5 m WC
- Temperature-resistant from -45 °C to + 65 °C
- Test values which are significantly above the requirements of DIN EN 60312
- Colour: Blue - Silver
- High recognition factor due to combined colouring

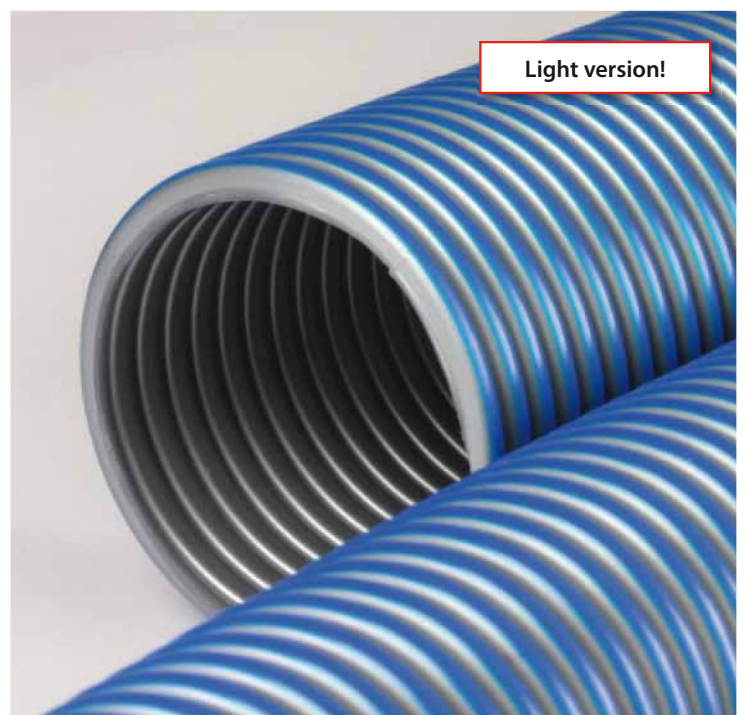

Highly flexible profile: Very smooth hose interior and excellent recovery properties after pressing together or bending

EVA-suction hoses

Blue - Silver. - 45 °C - + 65 °C

R+M Nr.	DN	↔
263 660 30	36 mm	30 m
264 060 30	38 mm	30 m
265 060 30	50 mm	30 m

Lightweight: Due to its round cross section profile this hose has excellent mechanical features and achieves test values which are significantly above the requirements of DIN EN 60312
