

Create your individual Suttner spray gun

If you are honest with yourselves, will you not appreciate seeing your company`s logo on your Suttner spray gun? Or do you prefer having the telephone number of your favourite restaurant or the web site of your football team on your spray gun? It's up to you. We will certainly let your dream come true.

In the following passage we show you how that works. These seven steps have to be made:

Step 1 choose your model: ST-2300 or ST-2600

Step 2 determine your desired version

Step 3 state your favourite colour

Step 4 fill in the file with the label and return it to R+M. Please provide us your logo in one of the most common kinds of file (BMP, FES, GIF) and inform us about the typeface and typesize which you have used

Step 5 release the processed logo in writing

Step 6 arrange for a one-time transfer for the production of the tools needed for the label

Step 7 place an order with us for 250 labels and one packing unit of spray guns (35 or 50 guns) without label
