

**easywash365+ spray guns by Suttner**

New freeze stop valves in **easywash365+** spray guns and freeze stop spray guns  
 The valves are made entirely of non-rusting materials.  
 Contrary to all commercially available freeze stop valves, the actual internal

valve body is made of a very wear-resistant, partially crystalline thermoplastic.  
 This difference significantly increases the robustness, reliability as well as preciseness in switching.
