Burner flame controls

**Landis & Gyr relay**

Voltage 220 - 240 V / 50 Hz. Scale 187 - 264 V.

**Danfoss relay**

Voltage 220 - 240 V / 50 Hz. Scale 195 - 252 V.

**Important**

In case of using the series BHO 70 together with BHA 11/12 the new LDS has to be connected with the terminals 11 (blue) and 12 (black) of the BHA 11/12.

In case of replacing the series BHO 70 by BHO 64 which is already used with BHA 11/12 it is essential to choose the version of BHA 11/12 (1 October 2006) at which terminal 11 is added.

An alternative is to exchange the old Danfoss base part.

**Socle Danfoss / Landis & Gyr**

- Socle with 12 connections
- Front plate for socle

**Photocell Danfoss**

- LDS 037H7057 with cable
- Flange photocell
- Tension ring

**Coils**

**Suitable for Sirio**
