

The choice of perfection

R+M Newsletter October 2022

Ladies and Gentlemen!

We get back to you with innovative products and report on the progress of our new building in Heiligenhaus, patents, and the ISO recertification.

With our new Internet telephony, calls are no longer made via a classic analogue telephone connection, but via a broad-band Internet connection. Another investment for the future.

Your feedback is very important to us and enables us to further improve things. Please feel free to contact us in case of any wishes and questions.

Best regards

Your R+M / Suttner Team

Suttner ST-2320 spray gun

The robust low and medium-pressure spray gun, made from food-safe plastics and a high-quality brass/stainless steel valve, impresses with its handy, ergonomic shape and is ideal for high flow rates.

Unbreakable, shockproof and robust, the gun can

be used for all extensive cleaning work in the food industry.

Suttner unloader valve ST-265

With the new bypass valve ST-265 we are setting new quality standards:

This innovative Suttner product is particularly durable, easy to maintain and has a smooth switching behavior, can be used at working pressures of up to 350 bar and is impressive thanks to the high-quality material combinations and high-alloy stainless steel and ceramic valve elements.

If you want to switch the pump motor off during breaks, use the ST-265 with integrated switch. The switch is a selective switch for NC/NO signal and will also be available as retrofit kit as from November.

Suttner safety valve ST-220

The Suttner ST-220 safety valve offers you a top-class product for overpressure protection up to 700 bar.

As an innovative and also exceptionally robust product with a flattened spring contour, it offers the

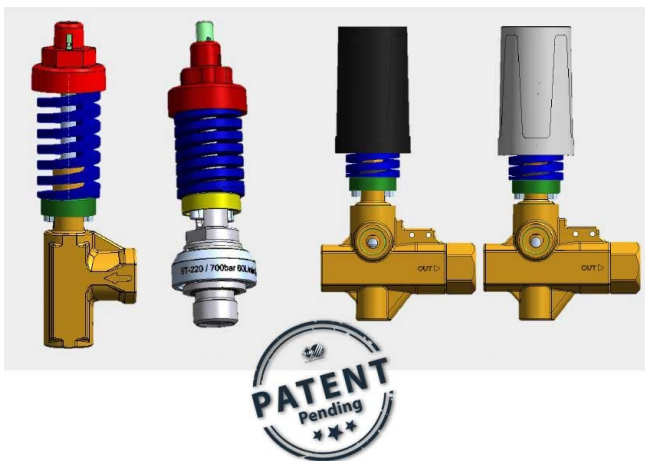

possibility of very precise and stepless adjustment.
The sealing kit is also easy to replace.

New patented product family

Two innovative accessories for high-pressure pumps have been presented on our website and will be protected by a patent in future: The new relief valve ST-220 and the bypass valve ST-265. We continue to do research and develop new products of highest quality which are safe and durable to meet your requirements.

Progress of our new building in Heiligenhaus

Since February 2022, we have been documenting the construction progress at our new site in the so-called Innovationspark in our former home town Heiligenhaus.

Using a drone, we have been taking a look at the building from above since April. At the beginning of May, the trades electricians, heating, and sanitary installations were able to start their works since the windows and doors had already been installed at that time.

Our drone video made in August gives you an

impression of the dimensions of the new premises. We are looking forward to relocating to our new site and keep you informed.

As from spring 2023, our new address will be:

Bertha-Benz-Allee 7-11 | 42579 Heiligenhaus

Phone +49 2056 16333 0 | Fax +49 2056 16333 3400

[View the drone video](#)

Our Group has been recertified according to DIN EN ISO 9001

This year again, our Group was certified and we are counted among the certified companies until the next audit in August 2025. The quality management standard ISO 9001 is the most widely accepted standard regarding quality management (QM) on a national and international basis. The introduction of this standard enables the improvement of the corporate performance on any level. We are proud of this certification and put our business relations on a firm footing.

EQUIP AUTO in Paris

We are looking forward to welcoming you to Paris Expo Porte de Versailles as from 18 October 2022.

Did you know...?

New telecommunications system

The IT department has had a lot to do in the last few weeks: packages of new telephones with the latest Voice over IP technology have been connected, set up and installed.

With this Internet telephony, calls are no longer made via a classic analogue telephone connection, but via a broad-band Internet connection. Another investment for the future!
