

The choice of perfection

R+M / Suttner Newsletter February 2023

Ladies and Gentlemen!

Our relocation from 14 to 28 April 2023 to Heiligenhaus is getting closer and we are looking forward to our new company headquarters. In addition to news about our relocation, we present our new heating and air conditioning technology using a drone. We would also like to inform you about the brand new high-pressure telescopic lances in our portfolio.

In the car wash sector, we offer high-quality mat cleaners featuring a new design and many colours. In the meantime, the company management participated in the afforestation of a plot of land in Heiligenhaus covering more than seven hectares.

Not only spades and hoes were very busy... This tree planting campaign in winter is intended to provide for a clear improvement of the climate in the future!

In this newsletter, we also provide information on the ventilation of pressure gauges and we highlight the sustainability of our products.

Please help us to become even better, send your feedback, and feel free to contact us in case of any wishes and questions.

Best regards

Your R+M / Suttner Team

High-pressure telescopic lances

For cleaning at great heights, we have now equipped our new, light, high-pressure telescopic lances with Suttner's new high-pressure spray gun ST-602.

Four different versions made of aluminum and fiberglass, with different lengths up to 7.8 meters, can now be found in our range.

Choose your outlet with a nozzle protector or the universal 1/4" M connection, which is also suitable for use with our rotating turbodevil wall cleaner.

News

Tree planting campaign in Heiligenhaus

Together with the municipal administration, the forestry department, and the association UBZ/Umweltbildung in Heiligenhaus e.V., a planting campaign with more than 800 tree seedlings was launched on 24 November 2022. The new forest near the pond Abtsküche will store many tonnes

of CO2 and provide for cooling of the environment.

The final spurt has begun - from 14 to 28 April 2023, the R+M de Wit Company will move to Heiligenhaus!

We all look back on an exciting planning and construction phase. But now things are getting closer and, in the final phase before the relocation, even more concrete and "cozy". The relocation is just around the corner and we are all looking forward to our new headquarters.

As from 2nd May 2023, we will be available at:

Bertha-Benz-Allee 7-11 | 42579 Heiligenhaus

Phone +49 2056 16333 0 | Fax +49 2056 16333 3400

During the relocation phase, purchase orders can be made in the online shop and e-mails can be sent to the info address. Please understand that we can only process your requests one after another as soon as the relocation will be completed.

RO-KA-TECH in Kassel

We are looking forward to welcoming you at the trade fair RO-KA-TECH for pipe, sewer, and industry services in Kassel (Germany) as from 09 May 2023.

At our booth 8-9 H8/B02, we will showcase innovative

products dealing with pipe and sewer cleaning.

Did you know...?

...that after the installation / assembly of pressure gauges filled with glycerine, a small opening must be pierced in the plug in the housing using a needle to ensure proper functioning? (Optionally, you can also use a paper clip or a pointed screwdriver to this end.)

Pressure gauges filled with glycerine need to be ventilated to allow the glycerine to expand and prevent measuring errors.

...about our recertification by Competentia?

The R+M de Wit Company received the award “Hier ausgezeichnet arbeiten” (Work excellently here) by Competentia again?

In the year 2020, the R+M de Wit GmbH was one of the first companies from Düsseldorf and the district Mettmann to receive this award. Now, two years later, the successful recertification and award of the seal “Hier ausgezeichnet arbeiten” by the Chamber of Industry and Commerce and Competentia Düsseldorf took place.

This award aims at companies which intend to be family- and staff-oriented and want to improve their performance sustainably. Fields such as working environment, compatibility of family and career, management, benefits, personnel development, and communication are examined. “We are very pleased to receive this award again. This certification process helped us to carefully examine everything again and to uncover potential for improvement.

...that our products are very sustainable?

Durability is the essence of quality, research, and development.

As a Top 100 innovative company, we also think about the environment and always offer spare parts for our products. Our guns are developed for professional cleaning and, featuring the LTF technology, they also focus on ergonomics, such as holding force reduced by 90 % and trigger force reduced by 40 % compared to customary guns in the market...
